

# Integra Dual Heat Warming System

**Patented Top-to-Bottom Warming System:** single unit, overhead heating source with base warming tray that works with any vessel

**Unique Heating Technology:** warms food without drying or cooking the surface, compared to traditional lights

**Green Solution:** low amperage, daisy chain up to 3 units, and 20% more efficient than a traditional double heat light and standard warming tray

**LED Lighted Canopy:** light color and structure designed to highlight food; multi-year life; optional etched logo or customization available

**Adjustable Bottom Heat:** warming tray base heat range 105-250°F; top heat on/off

OUTLET IN BACK

Part Number	Power				Temp F (C)	Weight lbs.	Dimensions In.		
	W	V	amps	Hz			W	D	H
