Features:

Premium Features

High-quality, premium stainless steel designed to retain its luster with a mirror-polish finish or finger-print resistant matte titanium. Our signature t-shaped handle and cartridge axle system offer stylish control to open the lid at virtually any angle while serving guests time after time.

Advanced Condensation Management

Industry's only waterfall condensation return system collects condensation and gently returns it back into the vessels base without splashing onto the food or countertop.

Integrated side vents release steam away from guests to reduce condensation and steam bursts

Versatile Performance

Each chafer is fully functional no matter what your heat source: fuel, heating element, or induction. Our induction-compatible round & square Radiance stands work seamlessly with our Induction DOT (SM-360) to provide even, efficient induction warming.
