

## AireServe Mobile Induction & Frost Top Serving Carts

Transform the dining experience for your guests with the contemporary and airy AireServe Mobile Buffet Induction and Frost Top Serving Carts by Spring USA. Designed for on-location catering, events, poolside, rooftops, and other buffet environments, the AireServe induction & frost top buffet carts combine style, design, and performance in a compact 60" footprint.

### Features:

- Open & modern design in a compact 60" footprint
- Featuring industry-leading foodservice solutions by Spring USA
  - AS6028: Two hidden 650W MAX Induction™ hold-only induction ranges with SmartScan™ technology for safer and more energy-efficient power over gas, electric, fuel, or flame
  - ASFT6028: 48" hidden frost top provides consistent cooling without the hassle of ice
  - Use in combination for a contemporary hot/ cold buffet set-up
- Butcher-block style, 12mm SmartStone™ countertop in Fawn woodgrain honed finish with a polished and sealed edge
- Premium, food-grade WilsonArt laminate in Char Walnut finish
- Internal power management system features a 6-outlet NEMA 5-20R UL-certified power strip
- Heavy-duty 5" locking & swiveling casters for increased durability and easier maneuverability compared to typical 4" casters
- Made in the USA of foreign and domestic parts
- Customization available

### Backed by the Power of Spring USA

At Spring USA, we stand by our products. All components and materials are covered by a standard warranty as specified in individual component manuals/ spec sheets.

## HIGHLIGHTS |

### Sophisticated Design

The AireServe induction buffet & frost top carts feature an open & modern design that offers an alternative to the bulky and cumbersome design of some traditional foodservice furniture - the AireServe breezes through standard doorways with its butcher-block style, NSF-certified SmartStone countertop in Fawn woodgrain and premium, food-grade WilsonArt laminate in alluring Char Walnut finish.

### Maximum Performance & Versatility

Thoughtful design discreetly hides equipment with drop-down induction control panels for industry-leading, energy-efficient MAX Induction power with SmartScan technology that is safer and more efficient than gas, electric, fuel, or flame - or a hidden frost top compressor for clean, consistent cooling without the hassle of ice - no dripping, uneven cooling, constant changeout of ice, storage challenges, etc.

### Effortless Maneuverability

Take your menu mobile with the AireServe's functional features like a 23-inch push bar handle, heavy-duty 5" diameter swivel casters with brakes, and a slim construction that ensures effortless maneuverability. Delight guests wherever they convene with action stations or hot/ cold buffet experiences for tapas, warm breakfast stations, warm desserts, sushi stations, dessert service, rolled ice cream, cold breakfast stations, and more.
