

BOH Series Stock Pot Induction Range

Spring USA's BOH Series Stock Pot Induction Range delivers unrivaled safety and performance for cooking with induction-ready stock pots. Perfect for soups, seafood, pastas or sous vide in large quantities, the BOH Series stock pot induction range is a dedicated station that utilizes the power of induction for increased efficiency & control to boil water faster than gas or electric cooking ranges.

Highlights:

- Ergonomic, low-profile design based on OSHA guidelines to reduce the risk of injury on the operator when lifting even the heaviest of stock pots
- Powered by Spring USA MAX Induction from 1800W - 3500W for an energy-efficient alternative to traditional gas or electric
- Drop-in MAX Induction ranges allow for ranges to easily be removed, repaired, or replaced - no technician required, zero service calls
- Expertly welded in the USA, premium stainless steel cabinets with fully-sealed welds to reduce harboring of food particles and bacteria

Limited 1 Year Warranty:

Spring USA's line of professional induction ranges are guaranteed durable and reliable. Each and every induction range is expertly crafted to meet rigorous testing and performance standards. We don't just guarantee it, we prove it with a **less than 1% failure rate** backed by an **overnight exchange warranty**.

FEATURES |

Flameless Heat Solution

Cutting-edge MAX Induction units powered by SmartScan® technology set a new standard in precision heating and recovery. Lightning-fast boiling & even heat distribution and preventing scorching or burning.

Effortless Installation & Maintenance

Our drop-in induction units offer effortless maintenance, repair, and replacement, with each induction unit individually mounted and operated. Designed for convenience, our stock pot stands are equipped to accommodate Spring USA drop-in units ranging from 1800W to 3500W, providing versatile options to suit your specific needs.

Built to Last

Crafted from robust stainless steel, our BOH Series Stock Pot Induction Ranges are engineered to thrive in demanding BOH environments. Reinforced with sturdy welds, they are capable of supporting substantial weight, making them ideal for even the most sizable stock pots. These stands facilitate effortless handling of heavy stock pots, mitigating the risk of potential injuries for users.

MODELS |

SKU	Ranges	Application	Voltage	Phase	Hertz	Wattage	Amps	Plug
BOH-3500STP	SM-350R	Cooking	208-240	1	60	3500	16	NEMA 6-20P
BOH-2600STP	SM-261R	Cooking	208-240	1	60	2600	10.8	NEMA 6-20P
BOH-1800STP	SM-181R	Light Cook / Hold	110-120	1	60	1800	15	NEMA 5-15P

RECOMMENDED CAPACITIES |

These recommendations are aligned with our sustainability initiative, however, larger quantities may be used. Each stock pot range went through our vigorous testing protocols for efficiency and performance.

SKU	Power (w)	Recommended Capacity*	Application
BOH-3500STP	3500	25 qt	Cooking
BOH-2600STP	2600	15 qt	Cooking
BOH-1800STP	1800	10 qt	Light Cook / Hold

*Based on Energy Star/ EPA testing guidelines for energy-efficient cooking and reduced power consumption.
